Board of directors: Dr. Peter Schiefer

Number of employees WOLFFKRAN group: approx. 800

Product range: WOLFF top-slewing cranes with luffing jib
WOLFF top-slewing cranes with trolley jib

Rental fleet: approx. 700 WOLFF tower cranes

WOLFFKRAN. The name stands for experience and competence in the design, construction and use of tower cranes. With innovative technology and know-how, the company has significantly contributed to the rapid developments that have occurred to date in the field of material handling. The foundation stone upon which the success of the company has been built was laid over 100 years ago by Julius Wolff with the design and construction of the first slewing crane. A few years later, this was followed by development of the world's first self-erecting top-slewing tower crane, a revolutionary invention for the construction sector. Today around 800 dedicated employees ensure that the innovation process continues and the WOLFF brand representative is of a comprehensive range of trolley jib and luffing jib cranes. Branch offices across Germany and subsidiaries in Austria, Belgium, Switzerland, France, Great Britain, the USA and the United Arab Emirates, as well as the headquarters for international business in Zug are guarantor for intensive customer care.

With a rental fleet of approx. 750 tower cranes WOLFFKRAN is among the major providers in this area of business. This underscores the flexibility and dynamics of the tower crane specialist serving customers worldwide as both manufacturer and service provider.
